

Isacco Bosio

aka me

Frontend Developer
with a rabbit hole in UX/UI design

About me

I'm 28, passionate about building high-quality mobile applications and always eager to explore new solutions. Logical and analytical by nature, I enjoy tackling complex problems and finding efficient, scalable architectures. My curiosity drives me to continuously learn and bring the latest best practices to the projects I work on, both professionally and as a personal pursuit. Working in interface design and programming allows me to combine creativity with technical rigor, delivering smooth, modular, and user-friendly experiences. I thrive in collaborative teams, enjoy sharing knowledge, and always aim to contribute positively beyond code.

Work Experience

2022-today

Mobile Developer @ Fatture in Cloud

Native front-end development with React Native

- Updated the application from version 0.69 to 0.74 to simplify future upgrades and improve performance for our users.
- Upgraded React Navigation from v4 to v6, performing a complete refactor of the app's navigation.
- Managed automatic releases on app stores using Fastlane, leveraging both public beta and production versions.
- Promoted activities aimed at developing features to enhance product usability and overall user experience.
- Analyzed and designed the implementation of Expo with Expo EAS for managing OTA updates.
- Coordinated the transfer of two applications from one developer account to another.
- Developed a new login flow implementing OAuth2 with a proprietary provider (TeamSystemID).
- Managed the native frontend team on cross-team projects, coordinating with Product Owners and multiple development teams.
- Maintained and updated a Design System.
- Supervised and provided technical guidance to a new colleague.

2020-2022

Frontend Developer & UX/UI Designer @ BluniTeam

Responsible for web and native front-end development with React, Angular and React Native

- Responsible for UX/UI of Web and Native applications
- Task management and team collaboration
- Tutoring activities

2015-today

Website creator and maintainer

WordPress website creation

- Manage client communication and define project requirements.
- Create custom websites tailored to client needs.
- Maintain and update all websites I have developed over the years.
